

Project Management in the Public Sector

Time pressures, complexity of project work, and a lack of sufficient resources make working on projects challenging and difficult. Effective project management principles and skills prove to be invaluable tools for public sector professionals who are tasked with managing important projects within the challenging public sector environment. This programme provides the opportunity to develop substantial project management skills that are specific to the public sector. It will enable delegates to examine the theoretical and analytical frameworks of project management within a public sector environment.

Structure

This programme will be delivered over 3 days. Delegates completing the programme will receive a certificate of attendance.

Who should attend?

- Public sector employees, project managers and executives
- Project managers wishing to transition to the public sector
- Professionals who want to improve hard and soft project management skills
- Employees of state-owned enterprises (SOEs)
- Municipal managers, executives and councillors
- Ward committee members

Upon completion of the programme, delegates should be able to:

- Initiate, plan, execute, monitor, lead, control, and successfully close projects with a specific focus on how these are applied in the public sector;
- Apply the tools and techniques of project management; and
- Understand the unique challenges presented by public sector projects.
