

Management in the Mining Sector

The mining sector forms a large part of South Africa and many African countries' economic endeavours. The mining sector is constantly reminded of international economic and political turbulence. Providing leadership within the mining sector requires innovative, fresh and dynamic management and leadership attributes.

Structure

This programme will be delivered over 5 days. Delegates will be required to complete a project in order to successfully complete the programme. Delegates completing the programme will be awarded with a certificate of competence.

Who should attend?

- Managers in the mining sector
- Specialist practitioners including mining engineers and mining geology consultants
- Mining resource managers

Upon completion of the programme, delegates should be able to:

- Understand the complex business of affirming decision-making within this sector.
- Integrate the multi-dimensional nature of planning, executing and monitoring of mining-related functions.
- Identify local and international impacts for strategic positioning.
- Apply functional mining-related organisational management.
- Develop and enhance leadership acumen.
