

Risk Management in the Mining Sector

Across the world mining operations are subject to a complex matrix of risk, which present decision makers with multi-faceted challenges. Therefore, bespoke risk mitigation skills are imperative and a sought-after expertise. Mining operations locally continue to face an ever-expanding basket of external risk factors including labour relations, falling commodity prices and increasing costs of operations. This programme aims to enhance the risk management skills of delegates by applying theory-based risk management techniques.

Structure

This programme will be delivered over 3 days. Delegates will be required to complete a project in order to successfully complete the programme. Delegates completing the programme will be awarded with a certificate of competence.

Who should attend?

- Managers in the mining sector
- Mining sector consultants
- Specialist mining risk officials
- Government and regulatory agency operatives

Upon completion of the programme, delegates should be able to:

- Apply risk identification, assessment and mitigation skills.
- Apply risk management, communication and monitoring skills.
- Impact strategic mining environment scanning abilities.
- Integrate mining operations and functionality insight.
