

Supply Chain Management

The world in which we live can best be described as everchanging. With a burgeoning population and changing needs, businesses have been strained more than ever before. Present day consumers are more aware of their value expectations. As such, organisations have become more demand-driven and customer focused. Supply chain management is often leveraged as a mechanism for obtaining and sustaining a competitive advantage in a constantly changing marketplace. The field of supply chain management has evolved such that it is now a critical company function. Professionals in this field play a key role in fulfilling customer demands, ordering and managing inventory, controlling inbound and outbound shipments, reducing costs, saving time and meeting company objectives.

Structure

This programme will be delivered over 3 days. Delegates will be required to submit an assignment in order to successfully complete the programme. Successful delegates will receive a certificate of competence.

Who should attend?

- This programme is ideal for private and public sector delegates who are involved in supply chain management and are active in this area of the business
- Managers/Executives who wish to be more effective in the application of their trade
- Small business owners
- Entrepreneurs
- Junior managers
- Administrators

Upon completion of the programme, delegates should be able to:

- Evaluate and solve complex supply chain problems.
- Develop and execute strategies to improve supply chain performance.
- Apply sound policies to improve customer value and total cost of ownership.
- Coordinate activities across the spectrum of supply chain functions.
- Develop strategies to built resiliency within a supply chain.
